

PROTECT YOUR TECH FROM NATURAL DISASTERS

1.

Safeguard your hardware's physical assets

Flood-proof your workspace and secure vital technology in waterproof and fireproof safes. Keep tech away from windows and unplug devices to avoid damage from a power surge or flood.

2.

Backup your data

Perform backups routinely and store data remotely. Keep a complete inventory of where your data is stored, especially if you're using multiple platforms or systems.

3.

Have a disaster plan in place

Your emergency plan should cover everything you need including where you can secure a backup laptop or portable power source.

Following a disaster, remember the Florida Realtors® Tech Helpline is here to help Realtors® with their tech needs.
